				Active Listening	67	1	79				

LEVEL and IMPT (IMPORTANCE) refer to the Target Network Systems and Data Communications Analysts. GAP refers to level difference between Network and Computer Systems Administrators and Network Systems and Data Communications Analysts.

ASK ANALYSIS

Ability Level Comparison - Abilities with importance scores over 50

Description	Network and Computer Systems Administrators	Network Systems and Data Communications Analysts	Importance
Near Vision	66 	57 	78 
Written Comprehension	67 	64 	75 
Deductive Reasoning	71 	60 	75 
Problem Sensitivity	69 	57 	72 
Oral Comprehension	66 	59 	68 
Inductive Reasoning	73 	59 	68 
Information Ordering	62 	59 	68 
Category Flexibility	57 	51 	65 
Oral Expression	73 	64 	62 
Originality	59 	53 	62 
Written Expression	51 	57 	59 
Number Facility	44 	51 	59 
Selective Attention	53 	44 	59 
Finger Dexterity	64 	46 	59 
Speech Recognition	53 	48 	59 
Fluency of Ideas	60 	51 	56 
Mathematical Reasoning	51 	44 	56 
Flexibility of Closure	60 	44 	56 
Speech Clarity	41 	46 	56 
Perceptual Speed	50 	44 	50 
Visualization	62 	48 	50 
Far Vision	51 	44 	50 

Skill Level Comparison - Abilities with importance scores over 69

Description	Network and Computer Systems Administrators	Network Systems and Data Communications Analysts	Importance
Equipment Selection	66 	74 	83 
Troubleshooting	74 	77 	81 
Complex Problem Solving	67 	74 	80 
Active Listening	66 	67 	79 
Active Learning	72 	71 	78 

Most Common Educational/Training Requirement:

Bachelor's degree

Bachelor's degree

Job Zone Comparison

4 - Job Zone Four: Considerable Preparation Needed

A minimum of two to four years of work-related skill, knowledge, or experience is needed for these occupations. For example, an accountant must complete four years of college and work for several years in accounting to be considered qualified.

Most of these occupations require a four - year bachelor's degree, but some do not.

Employees in these occupations usually need several years of work-related experience, on-the-job training, and/or vocational training.

3 - Job Zone Three: Medium Preparation Needed

Previous work-related skill, knowledge, or experience is required for these occupations. For example, an electrician must have completed three or four years of apprenticeship or several years of vocational training, and often must have passed a licensing exam, in order to perform the job.

Most occupations in this zone require training in vocational schools, related on-the-job experience, or an associate's degree. Some may require a bachelor's degree.

Employees in these occupations usually need one or two years of training involving both on-the-job experience and informal training with experienced workers.

Tasks

Network and Computer Systems Administrators

Core Tasks

Generalized Work Activities:

- Interacting With Computers - Using computers and computer systems (including hardware and software) to program, write software, set up functions, enter data, or process information.
- Updating and Using Relevant Knowledge - Keeping up-to-date technically and applying new knowledge to your job.
- Getting Information - Observing, receiving, and otherwise obtaining information from all relevant sources.
- Making Decisions and Solving Problems - Analyzing information and evaluating results to choose the best solution and solve problems.
- Thinking Creatively - Developing, designing, or creating new applications, ideas, relationships, systems, or products, including artistic contributions.

Specific Tasks

Occupation Specific Tasks:

- Confer with users to discuss issues such as computer data access needs, security violations, and programming changes.
- Coordinate implementation of computer system plan with establishment personnel and outside vendors.
- Develop plans to safeguard computer files against accidental or unauthorized modification, destruction, or disclosure and to meet emergency data processing needs.
- Document computer security and emergency measures policies, procedures, and tests.
- Encrypt data transmissions and erect firewalls to conceal confidential information as it is being transmitted and to keep authorized digital transfers

Network Systems and Data Communications Analysts

Core Tasks

Generalized Work Activities:

- Interacting With Computers - Using computers and computer systems (including hardware and software) to program, write software, set up functions, enter data, or process information.
- Communicating with Supervisors, Peers, or Subordinates - Providing information to supervisors, co-workers, and subordinates by telephone, in written form, e-mail, or in person.
- Getting Information - Observing, receiving, and otherwise obtaining information from all relevant sources.
- Thinking Creatively - Developing, designing, or creating new applications, ideas, relationships, systems, or products, including artistic contributions.
- Communicating with Persons Outside Organization - Communicating with people outside the organization, representing the organization to customers, the public, government, and other external sources. This information can be exchanged in person, in writing, or by telephone or e-mail.

Specific Tasks

Occupation Specific Tasks:

- Adapt and modify existing software to meet specific needs.
- Assist users to diagnose and solve data communication problems.
- Consult customers, visit workplaces or conduct surveys to determine present and future user needs.
- Design and implement systems, network configurations, and network architecture, including hardware and software technology, site locations, and integration

to keep out tainted digital transfers.

- Maintain permanent fleet cryptologic and carry-on direct support systems required in special land, sea surface and subsurface operations.
- Modify computer security files to incorporate new software, correct errors, or change individual access status.
- Monitor current reports of computer viruses to determine when to update virus protection systems.
- Monitor use of data files and regulate access to safeguard information in computer files.
- Perform risk assessments and execute tests of data processing system to ensure functioning of data processing activities and security measures.
- Review violations of computer security procedures and discuss procedures with violators to ensure violations are not repeated.
- Train users and promote security awareness to ensure system security and to improve server and network efficiency.

Detailed Tasks

Detailed Work Activities:

- adjust computer operation system
- communicate technical information
- conduct computer diagnostics to determine nature of problems
- confer with personnel to discuss security violations or programming
- develop policies, procedures, methods, or standards
- evaluate computer system user requests or requirements
- follow confidentiality procedures
- follow data security procedures
- identify appropriate software for project
- install electronic equipment, components, or systems
- install security measures
- maintain or repair computers or related equipment
- monitor use of computer data files to safeguard information
- obtain information from individuals
- perform minor repairs to hardware, software, or peripheral equipment
- plan computer security measures
- prepare instruction manuals
- provide technical support to computer users
- revise or correct errors in computer programs, software, or systems
- test computer programs or systems
- train workers in use of computer and

of technologies.

- Develop and write procedures for installation, use, and troubleshooting of communications hardware and software.
- Identify areas of operation that need upgraded equipment such as modems, fiber optic cables, and telephone wires.
- Maintain needed files by adding and deleting files on the network server and backing up files to guarantee their safety in the event of problems with the network.
- Maintain the peripherals, such as printers, that are connected to the network.
- Monitor system performance and provide security measures, troubleshooting and maintenance as needed.
- Read technical manuals and brochures to determine which equipment meets establishment requirements.
- Set up user accounts, regulating and monitoring file access to ensure confidentiality and proper use.
- Test and evaluate hardware and software to determine efficiency, reliability, and compatibility with existing system, and make purchase recommendations.
- Train users in use of equipment.
- Visit vendors, attend conferences or training and study technical journals to keep up with changes in technology.
- Work with other engineers, systems analysts, programmers, technicians, scientists and top-level managers in the design, testing and evaluation of systems.

Detailed Tasks

Detailed Work Activities:

- adjust computer operation system
- check hardware or software to determine reliability
- communicate technical information
- configure computers in industrial or manufacturing setting
- consult with customers concerning needs
- establish and maintain relationships with team members
- evaluate computer system user requests or requirements
- follow data security procedures
- follow data storage procedures
- implement computer system changes
- maintain client-server database
- maintain or repair computers or related equipment
- monitor computer operation
- monitor use of computer data files to safeguard information
- operate computer networks
- perform minor repairs to hardware,

related equipment

- understand computer equipment operating manuals
- understand technical information for electronic repair work
- use computers to enter, access or retrieve data
- use interpersonal communication techniques
- use knowledge of investigation techniques
- use precision tools in electronics repair
- use spreadsheet software
- use word processing or desktop publishing software

Technology - Examples

Access software

- Access management software
- Mac HelpMate
- Remote desktop control software

Administration software

- Cisco Systems CiscoWorks
- Element management software
- Hewlett-Packard HP Network Node Manager
- Network address management software
- Network documentation software
- Network management software
- Network shutdown software
- Simple network management protocol SNMP software
- SolarWinds software

Analytical or scientific software

- Root cause analysis software

Authentication server software

- Password management software

Backup or archival software

- Backup and archival software
- Symantec Ghost Solution Suite
- System and data disaster recovery software
- VERITAS Backup Exec

Compiler and decompiler software

- Command interpreters

software, or peripheral equipment

- prepare instruction manuals
- prepare technical reports or related documentation
- program computers using existing software
- program mainframe computer
- provide technical computer training
- provide technical support to computer users
- recommend purchase or repair of furnishings or equipment
- recommend software or hardware purchases
- resolve symbolic formulations in data processing applications
- select business applications for computers
- test computer programs or systems
- test data communications hardware or software
- train workers in use of computer and related equipment
- train workers in use of equipment
- understand computer equipment operating manuals
- use computer application flow charts
- use computer networking technology
- use computers to enter, access or retrieve data
- use knowledge of mainframe computers
- use project management techniques
- use spreadsheet software
- use word processing or desktop publishing software
- work as a team member
- write computer software, programs, or code

Technology - Examples

Access software

- Access management software

Accounting software

- Account management software

Administration software

- Asset management software
- Cisco Systems CiscoWorks
- Citrix MetaFrame
- Element management software
- Lucent VitalSuite
- NetIQ software

• Network documentation software

Computer based training software

- Computer based training software

Configuration management software

- Application management software
- Automated installation software
- Configuration management software

• Microsoft Windows Sysprep

- Patch and update management software

- Systems and applications migration software

Data base management system software

- Oracle software

Data base reporting software

- ReCrystallize Crystal Reports

Data base user interface and query software

- Structured query language SQL

Desktop communications software

- Secure shell SSH software

Development environment software

- C

Enterprise application integration software

- Enterprise application integration EAI software
- Systems integration software

Gateway software

- Microsoft Windows Terminal Services Access Manager

Graphical user interface development software

- Tk software

Helpdesk or call center software

- Help desk software

Internet directory services software

- Active directory software
- Berkeley Internet Domain Name BIND software
- Domain name system DNS software
- Network addressable storage NAS software

Network monitoring software

- Dartware InterMapper
- Ethereal
- IBM Director

• Network documentation software

- Simple network management protocol SNMP software

- SolarWinds software

Analytical or scientific software

- Root cause analysis software

Backup or archival software

- Backup and archival software
- Computer Associates ArcServ Backup
- System and data disaster recovery software

Charting software

- Microsoft Office Visio

Computer based training software

- Computer based training software

Configuration management software

- Application management software
- Automated installation software
- Configuration management software
- Patch and upgrade management software
- Software distribution software

Data base reporting software

- Network reporting software

Data base user interface and query software

- Database software

Development environment software

- Microsoft Visual Basic

- Mercury Interactive LoadRunner

Requirements analysis and system architecture software

- Requirements management software

Storage networking software

- Storage area network SAN software

Transaction security and virus protection software

- Encryption software

- Honeypot

- Packet filter software

- Ping software

- Root kit detection software

Tools - Examples

- Cable verifiers

- Computer tool kits

- Desktop computers

Presentation software

- Microsoft PowerPoint

Program testing software

- Mercury Interactive LoadRunner

- Mercury Interactive WinRunner

- Segue SilkPerformer

- System testing software

Requirements analysis and system architecture software

- Capacity planning software

- Network architecture design software

- Requirements management software

Spreadsheet software

- Microsoft Excel

Storage networking software

- Storage area network SAN software

Transaction security and virus protection software

- CA eTrust

- Encryption software

- McAfee VirusScan

- Packet filter software

- Penetration testing software

- Ping software

- Virus scanning software

Word processing software

- Microsoft Word

Tools - Examples

- Desktop computers

- Integrated services digital network ISDN analyzers

- Optical spectrum analyzers

- Mainframe computers

- Network multimeters

- Asynchronous transfer mode ATM analyzers

- Notebook computers

- Redundant array of independent disks RAID systems
- Optical spectrum analyzers
- Mainframe computers
- Asynchronous transfer mode ATM analyzers
- Network switches
- Notebook computers
- Power meters
- Protocol analyzers
- Punchdown tools
- Optical time domain reflectometers
- Screwdrivers
- Load balancers
- Tape libraries
- Wire crimpers

- Personal digital assistants PDA
- Fiber optic power meters
- Protocol analyzers
- Time domain reflectometers
- Load balancers

Labor Market Comparison

Description	Network and Computer Systems Administrators	Network Systems and Data Communications Analysts	Difference
Median Wage	\$ 57,690	\$ 59,790	\$ 2,100

Recommended Programs

Computer and Information Sciences, General

Computer and Information Sciences, General. A general program that focuses on computing, computer science, and information science and systems as part of a broad and/or interdisciplinary program. Such programs are undifferentiated as to title and content and are not to be confused with specific programs in computer science, information science, or related support services.

Institution	Address	City	URL
University of Maine at Augusta	46 University Dr	Augusta	www.uma.maine.edu/
University of Maine at Augusta	46 University Dr	Augusta	www.uma.maine.edu/

Husson College	One College Circle	Bangor	www.husson.edu
Thomas College	180 W River Rd	Waterville	www.thomas.edu
Thomas College	180 W River Rd	Waterville	www.thomas.edu

Information Technology

Information Technology. A program that focuses on the design of technological information systems, including computing systems, as solutions to business and research data and communications support needs. Includes instruction in the principles of computer hardware and software components, algorithms, databases, telecommunications, user tactics, application testing, and human interface design.

Institution	Address	City	URL
University of Maine		Orono	www.umaine.edu/

Computer Programming

Computer Programming/Programmer, General. A program that focuses on the general writing and implementation of generic and customized programs to drive operating systems and that generally prepares individuals to apply the methods and procedures of software design and programming to software installation and maintenance. Includes instruction in software design, low- and high-level languages and program writing; program customization and linking; prototype testing; troubleshooting; and related aspects of operating systems and networks.

Institution	Address	City	URL
Wasington County Community College	One College Drive	Calais	www.wccc.me.edu
Northern Maine Community College	33 Edgemont Dr	Presque Isle	www.nmcc.edu

Computer Systems Analysis

Computer Systems Analysis/Analyst. A program that prepares individuals to apply programming and systems analysis principles to the selection, implementation, and troubleshooting of customized computer and software installations across the life cycle. Includes instruction in computer hardware and software; compilation, composition, execution, and operating systems; low- and high-level languages and language programming; programming and debugging techniques; installation and maintenance testing and documentation; process and data flow analysis; user needs analysis and documentation; cost-benefit analysis; and specification design.

No schools available for the program

Computer Systems Networking and Telecommunications

Computer Systems Networking and Telecommunications. A program that focuses on the design, implementation, and management of linked systems of computers, peripherals, and associated software to maximize efficiency and productivity, and that prepares individuals to function as network specialists and managers at various levels. Includes instruction in operating systems and applications; systems design and analysis; networking theory and solutions; types of networks; network management and control; network and flow optimization; security; configuring; and troubleshooting.

Institution	Address	City	URL
Northern Maine Community College	33 Edgemont Dr	Presque Isle	www.nmcc.edu

Computer and Information Systems Security

Computer and Information Systems Security. A program that prepares individuals to assess the security needs of computer and network systems, recommend safeguard solutions, and manage the implementation and maintenance of security devices, systems, and procedures. Includes instruction in computer architecture, programming, and systems analysis; networking; telecommunications; cryptography; security system design; applicable law and regulations; risk assessment and policy analysis; contingency planning; user access issues; investigation techniques; and troubleshooting.

No schools available for the program

Management Information Systems and Business Data P

Management Information Systems, General. A program that generally prepares individuals to provide and manage data systems and related facilities for processing and retrieving internal business information; select systems and train personnel; and respond to external data requests. Includes instruction in cost and accounting information systems, management control systems, personnel information systems, data storage and security, business systems networking, report preparation, computer facilities and equipment operation and maintenance, operator supervision and training, and management information systems policy and planning.
